Notes to Consolidated Financial Statements

For the nine months ended September 30, 2008

(Unaudited)

1. NATURE OF OPERATIONS AND GOING CONCERN

The Company was incorporated on June 29, 2006, under the British Columbia Business Corporations Act. On December 14, 2006, the Company completed its initial public offering and its common shares began trading on the TSX Venture Exchange (the "Exchange") under the symbol "DCP.P".

As a Capital Pool Company ("CPC"), the principal business of the Company was to complete a Qualifying Transaction ("QT"). On July 13, 2007, the Company received final approval from the Exchange for the acquisition of three Mexican companies that collectively owned a significant portion of the Santa Gertrudis gold deposit in Mexico (Note 3), the related private placements (Note 6(d)) and the name change.

In 2007, the Company changed its year end from July 31 to December 31 such that these interim consolidated financial statements are for the nine months ended September 30, 2008 with comparatives for the nine months ended October 31, 2007.

The Company has no revenue and has a deficit of \$1,299,498 to date. The Company's operations are funded from equity financings which are dependent upon many external factors and may be difficult or impossible to secure.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation and principles of consolidation

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles and are inclusive of the accounts of the Company and its wholly-owned subsidiaries: First Silver Reserve, S.A. de C.V., Recursos Escondidos, S.A. de C.V. and Compania Minera Chuqui, S.A. de C.V. All intercompany transactions have been eliminated upon consolidation.

Interim financial statements

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles and follow the same accounting policies and methods of their application as the annual consolidated financial statements. These interim consolidated financial statements do not include in all respects the annual disclosure requirements of generally accepted accounting principles and should be read in conjunction with the most recent annual statements.

Use of estimates

The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amount of revenues and expenses during the period. Actual results could differ from these estimates.

2. SIGNIFICANT ACCOUNTING POLICIES - CONTINUED

Loss per share

The Company uses the treasury stock method to compute the dilutive effect of options, warrants and similar instruments. Under this method, the dilutive effect on loss per share is recognized on the use of the proceeds that could be obtained upon exercise of options, warrants and similar instruments. It assumes that the proceeds would be used to purchase common shares at the average market price during the period.

Foreign currency translation

The Company's reporting currency is the Canadian Dollar. The Company's Mexican operations are considered to be integrated operations with foreign currency transactions translated into Canadian Dollars as follows:

- monetary assets and liabilities at the rates of exchange prevailing at the balance sheet dates;
- other assets and liabilities at the applicable historical exchange rates;
- revenues and expenses at the average rates of exchange for the period; and
- gains and losses arising from the conversion of foreign-currency balances and transactions are reported in income as they occur.

Mineral properties

The cost of mineral properties and related exploration expenditures are deferred until the properties are placed into production, sold or abandoned. These deferred costs will be amortized over the estimated useful life of the properties following the commencement of production, or written-off if the properties are sold, allowed to lapse or abandoned.

Cost includes cash consideration and the fair market value of any shares issued for the acquisition of mineral properties. Properties acquired under option agreements are recorded in the accounts at such time as payments are made. Proceeds from options granted are applied to the cost of the related property and any excess is included in income for the period.

The recorded amounts of mineral claim acquisition costs and their related deferred exploration costs represent actual expenditures incurred and are not intended to reflect present or future values.

The Company reviews capitalized costs on its mineral properties periodically and will recognize an impairment in value based upon current exploration results and upon management's assessment of the future probability of profitable revenues from the property or from the sale of the property. Management's assessment of a property's estimated current fair market value may be based upon a review of other property transactions that have occurred in the same geographic area as that of the property under review.

2. SIGNIFICANT ACCOUNTING POLICIES - CONTINUED

Amortization

The Company provides for amortization on its equipment on a straight line method over the estimated useful life of the equipment.

Income taxes

The Company accounts for and measures future tax assets and liabilities in accordance with the liability method. Under this method, future income-tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amount of existing assets and liabilities and their respective tax bases. Future tax assets and liabilities are measured using enacted or substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on future tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the date of enactment or substantive enactment of the change. When the future realization of income tax assets does not meet the test of being more likely than not to occur, a valuation allowance in the amount of the future benefit is taken and no asset is recognized. Such an allowance applies fully to all potential income tax assets of the Company.

Stock based compensation

The Company has a stock option plan as described in Note 6(g) and accounts for all stock-based compensation arrangements entered into on or after June 29, 2006 using the fair value method, under which compensation expense is recorded based on the estimated fair value of the options at the date of grant as determined by the Black Scholes Option Pricing model.

Asset retirement obligations

The Company recognizes a liability for an asset retirement obligation when it is determinable and calculates the liability based upon undiscounted future payments to be made. A corresponding amount is added to the carrying amount of the related long-lived asset, and this amount is subsequently allocated to expense over its expected life. Adjustments will also be made in subsequent periods to changes in asset retirement obligations due to changes in estimates. As at September 30, 2008, the Company did not have any asset retirement obligations.

Retirement of long-lived assets

Long-lived assets are assessed for impairment when events and circumstances warrant, when the carrying amount of the asset exceeds its estimated undiscounted net cash flow from use or its fair value, at which time the impairment is charged to earnings.

2. SIGNIFICANT ACCOUNTING POLICIES - CONTINUED

Changes in accounting policies

On January 1, 2008, the Company adopted the following provisions of the Canadian Institute of Chartered Accountants ("CICA") Handbook Sections. There was no material impact on the Company's financial condition or operating results as a result of the adoption of these new standards:

- (a) Section 3862 – Financial Instruments – Disclosures, which replaces Section 3861 and provides expanded disclosure requirements that provide additional detail by financial asset and liability categories (see Note 11).
- (b) Section 3863 – Financial Instruments – Presentation, to enhance financial statement users' understanding of the significance of financial instruments to an entity's financial position, performance and cash flows (see Note 11).
- (c) Section 1535 – Capital Disclosures, which establishes standards for disclosing information about an entity's capital and how it is managed (see Note 12). Under this standard, the Company will be required to disclose the following:
 - qualitative information about its objectives, policies and processes for managing capital;
 - summary quantitative data about what it manages as capital;
 - whether during the period it complied with any externally imposed capital requirement to which it is subject; and
 - when the Company has not complied with such externally imposed capital requirements, the consequences of such non-compliance.
- (d) Section 1400 – General Standards of Financial Statement Presentation, to include requirements for management to assess and disclose an entity's ability to continue as a going concern (see Note 1).

3. QUALIFYING TRANSACTION

On July 5, 2007, the Company acquired 100% of the issued and outstanding common shares of First Silver Reserve, S.A. de C.V. ("First Silver"), Recursos Escondidos, S.A. de C.V. ("Recursos") and Compania Minera Chuqui, S.A. de C.V. ("Chuqui"). Together, these Companies control the Santa Gertrudis Gold Project in northern Mexico and at the date of acquisition owned or had options to acquire an aggregate of 35 mineral claims.

To acquire First Silver and Recursos, the Company made a non-refundable deposit of \$25,000, a subsequent cash payment of US\$650,000 and issued 1,500,000 of its common shares, which are subject to an escrow agreement. The Company will also make three additional payments of US\$500,000 to the vendor, MetalQuest ("MetalQuest") (formerly Sonora Gold Corporation), payable at the Company's discretion in cash or common shares on each of the first, second and third anniversary dates of the acquisition.

On March 27, 2008, the Company exercised its right to make the first anniversary payment of US\$500,000 due to MetalQuest in shares and issued 153,295 common shares valued at \$1.66 per share to MetalQuest for 50% of the first payment of US\$500,000. On July 9, 2008, the Company issued another 172,534 shares to pay for the remaining US\$250,000. As at September 30, 2008, the second anniversary payment of US\$500,000 payment was reported as a current liability on the Company's balance sheet, with the residual obligation, not due within one year, classified as non-current.

To acquire Chuqui, the Company paid \$200,000 in cash and issued 3,750,000 common shares, a portion of which is also subject to an escrow agreement.

A finder's fee of 379,000 common shares of the Company has also been paid to an arm's length party for the acquisition of First Silver and Recursos. These shares have been escrowed and will be released from escrow as consideration is paid for the acquisition, subject to various conditions.

Consideration for these acquisitions has been measured as equal to the total cash amounts paid and payable plus common shares of the Company issued at a value of \$0.50 each, which was the price of the concurrent private placement financings completed as more fully described at Note 6(d). The total consideration so determined of \$5,315,395 was applied to these acquired companies' working capital accounts at their carrying values, with the excess allocated to mineral property interests. The following table summarizes these amounts:

	First Silver	Recursos	Chuqui	Total
Cash and cash equivalents	\$ 18,133	\$ 622	\$ 1,411	\$ 20,166

San Enrique and Greta Option

MetalQuest, the vendor of First Silver and Recursos, had granted an option to Minera Teck Cominco, S.A. de C.V. ("MTC") whereby MTC can earn up to a 70% interest in certain mineral claims contiguous to the Santa Gertrudis property known as the San Enrique and Greta properties. Under the terms of the QT, the Company has a right of first refusal option to purchase the San Enrique and Greta properties from MetalQuest by paying US\$450,000 plus an additional US\$20 per ounce over 45,000 ounces on the San Enrique and Greta properties that are reported in a NI 43-101 compliant geological resource report and that are in the measured and indicated category using a 1.5 gram per tonne cut off. The amount due to exercise the option can be paid in common shares of the Company at its election. The Company's option will be only for a period of 120 days from the day MTC terminates its pre-existing option with MetalQuest.

On November 27, 2007, after MTC terminated its pre-existing option with MetalQuest, the Company signed a letter of intent to acquire the San Enrique and Greta properties, subject to applicable due diligence. On March 11, 2008, the Company exercised its option and acquired San Enrique and Greta properties by issuing 307,429 common shares at a value of \$1.44 per share.

Net Smelter Royalty

As a covenant with and lien on the Santa Gertrudis Property, when the Santa Gertrudis Property goes into production, the Company was subject to the following commitments:

- Through a sales-purchase agreement entered into in March 2002 by First Silver, First Silver is committed to pay production royalties to the seller or whomever the latter may designate as beneficiary, equal to 2% of the Net Smelter Return. This royalty is payable as to 1.33% to Queenstake Resources Ltd. and as to 0.67% to Campbell Resources Inc.
- Through a sales-purchase agreement entered into in September 2002 by Recursos, Recursos is committed to pay production royalties to the seller or whomever the latter may designate as beneficiary as follows:
 - i) Royalties equal to US\$0.10 for every ton of ore extracted, until a maximum of US\$2,000,000 is reached; and
 - ii) Production royalties equal to 1% of the Net Smelter Return.
- Net Smelter Return is defined as the fair market value of all products less all costs, charges and expenses paid or incurred by the Company with respect to such products; including those incurred after such products leave the property.

The Company purchased all of these Net Smelter Royalties by paying \$87,500 cash in 2007 and issuing 50,000 common shares at a value of \$1.25 per share on January 10, 2008. With these purchases, there are no remaining royalties on the Santa Gertrudis Property.

Bacanuchi

The Company entered into a letter of intent dated June 18, 2007, with the owner of the Bacanuchi property to acquire this property in consideration of issuing 400,000 common shares of the Company at a price of \$0.50 per share. \$10,000 was advanced to the property owner for mining taxes. The definitive purchase and sale agreement was completed in 2008 and the title has been registered with the authorities in Mexico. The Exchange approved this transaction on July 12, 2007 and the shares were issued on April 11, 2008.

c) Initial Public Offering:

The Company filed its final prospectus with the British Columbia and Alberta Securities Commissions on October 27, 2006, in order to offer to the public in British Columbia and Alberta a minimum of 1,500,000 common shares at a price of \$0.20 per share for total gross proceeds of \$300,000. The final Mutual Reliance Review System for Prospectuses decision document was issued on October 30, 2006. On December 12, 2006, the Company closed its IPO and the common shares of the Company began trading on the Exchange on December 14, 2006 under the symbol "DCP.P" as a Capital Pool Company.

Leede Financial Markets Inc., the agent for the Company's IPO, was paid a corporate finance fee of \$7,500 and a commission of \$30,000 in cash and was issued 150,000 agent's options with an exercise price of \$0.20 per share, expiring on December 14, 2008, with a fair value of \$18,977. Another \$18,183 was paid for other expenses related to the IPO. In July 2007, the 150,000 agent's options were exercised.

d) Private Placements:

On May 9, 2007, the Company closed the brokered portion of the private placement related to completion of its QT for gross proceeds of \$3,250,000. This financing was arranged by Pacific International Securities Inc. (the "Agent") who acted as the Agent for the brokered private placement. The Company issued 6,500,000 subscription receipts of the Company (the "Subscription Receipts") at \$0.50 per Subscription Receipt.

The Company also closed the non-brokered portion of the private placement for gross proceeds of \$2,950,000 on May 12, 2007 and issued 5,900,000 Subscription Receipts of the Company at \$0.50 per Subscription Receipt.

The total gross proceeds for these two financings was \$6.2 million and was released to the Company upon the completion of the QT.

The Subscription Receipts were converted into a unit (a "Unit") upon the closing of the QT. Each Unit consists of one common share and one half of a transferable common share purchase warrant. Each whole warrant allows the holder to purchase one additional share for a period of 24 months at \$1.00. The four-month hold period on these Subscription Receipts began on the date that the financings closed and expired on September 9 and September 12, 2007.

As consideration for its services, the Agent received 455,000 Units as commission and was issued 650,000 agent's warrants (the "Agent's Warrants") entitling the Agent to purchase 650,000 common shares at an exercise price of \$0.55 per share until July 5, 2009, with a fair value of \$62,353.

The Company also paid a finder's fee to Leede Financial Markets Inc. (the "Finder") of \$28,000 in cash and 80,000 Finder's warrants entitling the Finder to purchase 80,000 common shares at an exercise price of \$0.55 per share until July 5, 2009, with a fair value of \$7,674. Another \$23,413 was paid for other expenses related to the private placements.

11. FINANCIAL INSTRUMENTS

The fair values of the Company's cash and cash equivalents, amounts receivable, prepaid expenses, accounts payables and accrued liabilities and Due to MetalQuest Minerals Inc. approximate their carrying values.

The Company's financial instruments are exposed to certain financial risks, including currency risk, credit risk, liquidity risk, interest risk and commodity price risk.

(a) Currency risk

The Company's property interests in Mexico make it subject to foreign currency fluctuations and inflationary pressures which may adversely affect the Company's financial position, results of operations and cash flows. The Company is affected by changes in exchange rates between the Canadian Dollar and foreign functional currencies. The Company does not invest in foreign currency contracts to mitigate the risks.

11. FINANCIAL INSTRUMENTS – CONTINUED

(b) Credit risk

The Company's cash and cash equivalents are held in a Canadian financial institution. The Company does not have any asset-backed commercial paper in its cash and cash equivalents. The Company's amount receivable consists primarily of goods and services tax due from the federal government of Canada.

(c) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure.

Accounts payable and accrued liabilities are due within the current operating period.

(d) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The risk that the Company will realize a loss as a result of a decline in the fair value of the cash and cash equivalents is limited because they are generally held to maturity.

12. MANAGEMENT OF CAPITAL RISK

The Company manages its cash and cash equivalents, common shares, stock options and warrants as capital (see Note 6). The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

In order to maximize ongoing development efforts, the Company does not pay out dividends. The Company's investment policy is to invest its short-term excess cash in highly liquid short-term interest-bearing investments with maturities 90 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.

The Company expects its current capital resources will be sufficient to carry its exploration plans and operations through its current operating period.

13. DIFFERENCES BETWEEN CANADIAN AND UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP"). Material variations in the accounting principles, practices and methods used in preparing these financial statements from principles, practices and methods accepted in the United States ("U.S. GAAP"), and that impact financial statement line items, are described below.

Mineral property costs

Under Canadian GAAP, mineral exploration expenditures can be deferred on prospective mineral rights until such time as it is determined that further exploration work is not warranted, at which time the mineral exploration expenditures are written-off. Under U.S. GAAP, all exploration expenditures are expensed until an independent feasibility study has determined that the mineral rights are capable of economic commercial production.
